Star Building System's certifications and approvals assure our customers and construction professionals that all our products have undergone stringent third-party testing and comply to our engineering and manufacturing policies, procedures and practices.

Star's products are the result of product development and engineering innovations that are proven in more than 300,000 structures worldwide. Star focuses on state-of-the-art computerized processing systems which aid all phases of design, drafting and manufacturing. This advanced technology enables Star to provide more specialized buildings with a variety of aesthetic features. Star building systems are engineer certified for all 50 states to meet the structural provisions of required model codes, as well as state and local codes. A Star building meets the highest quality standards and provides design flexibility. Build your project with strength, speed, and flexibility. Build your project with the confidence and security of a Star building.
